Portfolio | GitHub | LinkedIn

SUMMARY

M2 student in Intelligent Systems & Computer Vision (Sorbonne Paris Nord), with an M1 in Data Science & Analytics from EPITA (14+/20 GPA) and 4+ years of hybrid AWS/Azure infrastructure experience at u-blox, including an 80% reduction in operational shortages. I build production-ready, containerized data pipelines and MLOps systems (Airflow, MLflow, FastAPI, Docker, AWS). **Seeking a 6-month end-of-studies internship (Jan/Feb 2027) in Data Engineering, MLOps or Cloud, anywhere in France or remote.**

EDUCATION

M2 Systèmes Intelligents et Vision par Ordinateur (SIVO), Université Sorbonne Paris Nord — **Paris, France | Sep '26 — Present**

Computer vision, neural networks, pattern recognition, image processing and deep learning.

M1 Data Science & Analytics, EPITA School of Computer Science — **Paris, France | Sep '24 — Jan '26**

Data Science in Production, Machine Learning, Deep Learning, Computer Vision, NLP, NoSQL Databases, Predictive Analytics, Statistics.

B.S. Computer Engineering, COMSATS University Islamabad — **Lahore, Pakistan | Sep '17 — Aug '21**

HEC Merit Scholarship recipient; developed a Top 5 ranked ML-based Automated Irrigation System.

PROFESSIONAL EXPERIENCE

Global Infrastructure Engineer | u-blox | Thalwil, Switzerland (Hybrid) — **May '22 — Sep '24**

- **Cloud & hybrid infrastructure:** managed AWS (EC2, S3, IAM, security groups) and Azure (Entra ID, VMs, RBAC) across global teams; migrated legacy on-premises workloads to hybrid cloud.
- **Automation & pipelines:** Python scripts for system health checks and log parsing; scheduled ETL workflows with Apache Airflow; Jenkins for CI/CD monitoring and GitHub for version control.
- **Jira/Confluence automation:** custom workflows, JQL and REST API scripts, saving 15+ operational hours per month.
- **Monitoring & governance:** Grafana dashboards and automated alerts; CAB Administrator applying ITIL change management with zero downtime.
- **Impact:** 80% reduction in operational shortages through system performance analysis and proactive maintenance.

Systems & Data Operations Engineer | Next Generation Technology Solutions | Lahore, Pakistan — **Sep '21 — May '22**

- Ran SQL checks (PostgreSQL/MySQL) to audit data and troubleshoot; wrote shell and Python scripts for log parsing and server health checks.
- L2 support on Linux and Windows servers, VMware ESXi virtualization and patching; ServiceNow incident tracking and SLA/uptime reporting; maintained SOPs and compliance documentation.

TECHNICAL PROJECTS

AWS Healthcare Big Data & MLOps Platform | GitHub — **2026**

- Event-driven Medallion (Bronze/Silver/Gold) data lake in a private AWS VPC for IoT telemetry and clinical batch data; ETL with Step Functions and Glue, querying with Athena, QuickSight dashboards.
- SageMaker anomaly detection on curated data with CloudWatch monitoring and automated feedback loops.

Semantic News Recommendation Platform | Python, FastAPI, FAISS, LightGBM | GitHub — **2026**

- Multi-stage funnel on the Microsoft MIND dataset: FAISS vector retrieval, LightGBM ranking and MMR re-ranking for diversity; addresses cold-start.
- FastAPI backend with PostgreSQL logging of clicks and impressions (CTR, dwell time), Docker, Streamlit analytics dashboard.

House Prices Industrialized MLOps Pipeline | Scikit-Learn, MLflow, GitHub Actions | GitHub — **2026**

- Leak-free ML pipeline refactored into a modular Python package; MLflow tracking and registry, PyTest and Flake8 quality checks, GitHub Actions CI/CD.

HealthVision: End-to-End MLOps Medical Platform | Airflow, FastAPI, Grafana, Docker | GitHub — **2026**

- Airflow DAGs for automated ingestion with Great Expectations data-quality gates, REST inference via FastAPI, Streamlit UI, PostgreSQL storage, Grafana dashboards for data drift.

TECHNICAL SKILLS

Cloud & DevOps: AWS (S3, EC2, IAM, Glue, Step Functions, Lambda, Athena, SageMaker, CloudWatch), Azure, Docker & Docker Compose, GitHub Actions, Jenkins, VPC security

Data Engineering: Python (Pandas, NumPy, ETL, REST ingestion), SQL (PostgreSQL), Apache Airflow, dbt, Medallion architecture, FastAPI, NoSQL

MLOps & ML: MLflow, Scikit-Learn, PyTorch, LightGBM, FAISS, Great Expectations, Grafana, computer vision

Infrastructure & BI: Linux (Ubuntu/CentOS), Windows Server, VMware ESXi, Hyper-V, Bash, Jira/Confluence, ServiceNow, Power BI, Tableau, Dataiku, Excel/VBA

CERTIFICATIONS

Azure Administrator Associate (Sep '23, expired Sep '24) | Azure Fundamentals AZ-900 (Apr '23) | Azure AI Fundamentals AI-900 (Apr '23) | Certified Python Entry-Level PCEP, KodeKloud (Dec '22) | DataCamp Associate Data Engineer in SQL | Atlassian Introduction to ITSM (Mar '24)

LANGUAGES & ADDITIONAL

English: full professional proficiency (16+ years of English-medium education). **French:** TCF A2, actively improving (12–14 h of weekly study).

Stanford Career-Prep Fellowship (Jun–Sep '20): selected from 6,100+ applicants; led a team that raised 100,000 PKR for charity and built the award-winning "Best Mega Project" mental health platform.
